

SETTING OUT CASE STUDY

Victoria's Secret Fashion Show, Miami, Florida, 2008

Problem: ES Group was asked to supply the temporary venue for the Victoria's Secret Fashion show, which took place at the Fountainbleau Hotel, Miami Beach in November 2008. The designed building had to fit into a very tight space on site, and fit around numerous below-ground services and finished structures.

Solution: LDS was contracted in to survey the existing structures and ground obstructions before the design of the building could be finalised. We returned to the site in Miami on two further occasions to set out the tower positions and levels during the hectic installation.
